The arrest and incarceration by the Mexican customs guards, one day this week, of T. Ruiz, the well known Nogales, Sonora barber, on a charge of smuggling, was a surprise to that gentleman's numerous friends on both sides of the international line. Yesterday he was again busy at his shop just across the line.

The American colony of Llano, Sonora, is happy and many hundred dollars richer, as a result of last Sunday's horse race at Santa Ana, between Frank Cox's racer and another record-breaker from Santa Ana. All of Llano and Santa Ana, as well as many admirers of out-door sports from Hermosillo, Magdalena and Nogales, were there with their moral and financial support, and several thousand dollars changed hands on the result. The race was pulled off soon after sunrise. A six-mile course had been staked off and men on fast horses were stationed at each quarter mile post to whip the horses. The Cox horse won the race, hence the rejoicing at Llano, and sadness at Santa Ana. Mr. Cox may decide to bring his horse to the United States. He is said to be a world beater.

### MITT QUINNER CLOSES DEAL.

Inventor of the Quinner Mill and Crusher Sells Interest.

Wednesday Mitt Quinner, inventor of the Quinner Mill and Crusher, undoubtedly the cheapest, most simple and best machine yet invented for the recovery of gold, on Wednesday, in this city, sold to the American Ore Mining Company, a certain interest in all his rights, receiving the sum of \$50,000, gold, cash, and \$300,000 worth of stock in the company, of which Sydney B. Wood of New York, is president; D. A. Richardson of Douglas, vice-president, and Frank W. Doan of Douglas, secretary and treasurer.

The price of these wonderful machines, several of which are now working in a most successful manner out in the Altar district, Sonora, where there is a great gold excitement, as a result of their installation and operation by the inventor, is only \$2500.

The Arizona-Sonora Manufacturing Company of this city, for which Roy & Titcomb, Inc., are agents, who built Mr. Quinner's first machine, will at once commence manufacturing the new machines which are now the talk of everybody interested in mining, especially those who own property down in the rich placer gold districts of Sonora. It is said that already the company has orders for a large number of machines, for immediate delivery.

Mr. Quinner has agreed to remain with the company five years and will personally superintend the installation of all machines sold by his company. Fifteen years he was connected with the great gold mines of one of the companies operating down at Minas Prietas, and sure knows gold when he sees it.
